Cyberattacks are common, and criminals target small and large businesses alike. No matter the size of your organization, you need visibility and protection across your entire network to spot and stop threats. With Structured’s Fortify for Network Security services, you receive complete security information and event management (SIEM) combined with 24x7x365 security operations center (SOC) support. It is the service you must have for a clearer view into network-based activities, especially if you have regulatory compliance obligations for HIPAA, PCI DSS, or the NIST SP 800 series.

Key Benefits

**Immediate threat identification**
Automated event correlation, real-time alerting, and log monitoring and management unite to provide rapid identification of malicious activity appearing on the network. Protect servers and firewalls with a fully integrated range of response capabilities to keep your resources and your data safe and available.

**Compliance readiness**
Prove adherence to three critical compliance frameworks: the Health Insurance Portability and Accountability Act (HIPAA), the Payment Card Industry Data Security Standard (PCI DSS), and the NIST SP 800 series. Structured’s Fortify for Network Security services offer advanced reporting and threat analysis to keep your business aligned with industry regulations.

**On-demand security operations**
Leverage a SOC that scales protection with your business. Achieve enterprise-level protection even as an SMB with expert, on-demand staff sufficient to protect your network resources from insidious activity.
Eyes on the Prize

Gain real-time visibility into malicious activity. Thwart attacks with speed and agility when you rely on Structured.

Benefits at a Glance

- 24x7x365 service
- Clear insight, rapid response to threat events
- Log monitoring and management, automated event correlation
- Reporting and analysis to demonstrate regulatory compliance

Seeing the upside? Contact your Structured account manager or email info@structured.com.

Monitoring and analysis

Continuous monitoring of key log files helps identify and correlate malicious events. Security tools powering the Fortify for Network Security platform discover threats faster and offer a more comprehensive dissection of advanced attacks. Accurate event diagnosis reduces false positives and alert fatigue, which makes your environment much more safe and your IT team much more sane.

Advanced reporting for compliance

Maintain and prove regulatory compliance as needed with comprehensive reports and threat analysis outlines for three regulatory standards: HIPAA, PCI DSS, and the NIST SP 800 series.

Threat intelligence support

Structured’s Fortify SOC identifies threats on servers and firewalls, and supports compliance guidelines through a fully integrated range of response capabilities. Your IT environment and your data remain protected and available 24x7.

Ultimate SIEM technology

Information from your network devices is collected, analyzed and retained by a powerful SIEM platform recognized as a Leader in the Gartner Magic Quadrant for 10 consecutive years. This platform, coupled with Structured’s global SOC services, offers cost-effective security and regulatory compliance help on an enterprise scale for even small and mid-size organizations.

About Structured

Structured is an award-winning solution provider delivering secure, cloud-connected digital infrastructure.

For nearly 30 years, we’ve helped clients through all phases of digital transformation by securely bridging people, business and technology. We provide design guidance, engineering assistance, and product recommendations that adhere to best practices, boost ROI, and -- most importantly -- maximize information security.
